## Summary

Cross-Platform Mobile Developer with 1 year of experience building engaging apps using Flutter, skilled in both development and UI/UX design principles.

## Projects

### E-Commerce application | Flutter

Developed a RESTful API-driven e-commerce application, using feature-first design system. Utilized GetX for state management and Git/GitHub for version control.

GitHub

### Task management application | Flutter

Developed a task manager with RESTful CRUD APIs, adhering to N-Tier architecture. Implemented state management using GetX, with Git/GitHub for version control and Postman for testing.

GitHub

### News paper application | Flutter

Developed a newspaper application using free APIs and N-Tier architecture. Employed Git/GitHub, Postman, and Figma for development, testing, and design.

GitHub
